The IMF's financial year is May 1 through April 30.

The unit of account of the IMF is the SDR; conversions of IMF financial data to U.S. dollars are approximate and provided for convenience. On April 30, 2008, the SDR/U.S. dollar exchange rate was US$1 = SDR 0.61585, and the U.S. dollar/SDR exchange rate was SDR 1 = US$1.62378. The year-earlier rates (April 30, 2007) were US$1 = SDR 0.65609 and SDR 1 = US$1.52418. References to dollar amounts are in U.S. dollars.

"Billion" means a thousand million; "trillion" means a thousand billion; minor discrepancies between constituent figures and totals are due to rounding.

As used in this Annual Report, the term "country" does not in all cases refer to a territorial entity that is a state as understood by international law and practice. As used here, the term also covers some territorial entities that are not states but for which statistical data are maintained on a separate and independent basis.

In tables, a blank cell indicates "not applicable," ellipsis points (...) indicate "not available," and 0 or 0.00 indicates "zero" or "negligible."
